

Listen together

Turn your music into a wall of album covers on the big screen, with tonight's shows near you mixed in. Good for a dinner, a party, or a night in.

1 Set up the screen

1. Plug a laptop into the TV, or use any computer with a big screen.
 2. Open map.dzco.tech (<https://map.dzco.tech/?music=open>) and press 🎵 at the bottom right.
 3. Pick **Spotify**, **Apple Music** or **YouTube** and sign in. Apple Music plays previews without an account.
-

2 Play from the wall

1. **Tap a cover** to play it; tap again to pause. A line runs round the cover as the song plays.
 2. Change the order: **by color**, **by year**, or **most played**.
 3. With Spotify, **Play on** sends the music to a speaker, a streamer or your TV's Spotify app. The wall follows what plays.
 4. Acts on the wall who play near you tonight get a gold halo. **Live in** takes you to their show on the map.
-

3 Bring your friends in

1. Press **Share** under the wall, then **Show on screen**: a QR code appears next to the title.
2. Friends scan it to get the same wall on their phones.
3. Running a **Spotify Jam**? Your guests' songs join the wall as they add them, in purple.

For listening at home. DZCO doesn't store what you play; see the [privacy page](#).

Scan to start: map.dzco.tech, then press 🎵
