

DZCO for venues

DZCO is a map of tonight's live shows. Make sure your shows are on it, see the shows you've hosted, and keep the map on the screens in your lobby or bar. It's free.

1 Get your stage on the map

1. Open map.dzco.tech and look for your venue on a show night.
 2. Not there, or shows missing? Go to map.dzco.tech/add-venue (<https://map.dzco.tech/add-venue/>).
 3. Tell us your venue and city, and where you list your shows: your website, a calendar, DICE, Eventbrite, Instagram.
-

2 See your venue's history

1. Type your venue's name in **Map my shows** at the top of the map.
 2. Your recent shows play back on a timeline, with the artists who've played your room.
 3. Share the link with your team, your regulars or the bands.
-

3 Put the map on your screens

- **Apple TV:** install **DZCO World** from the App Store and open it. That's all.
- **Any TV with a web browser**, or a small computer behind the screen: open map.dzco.tech/?tv=1 (<https://map.dzco.tech/?tv=1>).
- It fills the screen, tours tonight's shows on its own, and protects the screen from burn-in.
- It plays soft crowd sounds as shows start. For a quiet room, turn the TV's volume down.

Questions, or want your screens set up with your own shows first? Email info@dzco.tech.
